Jim Hobbs, Department of Human Services
Marvin Lindsey, Community Behavioral Health Association of Illinois
Rick Nance, Department of Human Services
Mike Ouska, Lutheran Social Services
Steve Vanderpoel, Chicago Children's Center for Behavioral Health

Review of Minutes

The work group approved the August 7th meeting minutes.

Illinois Health Information Exchange (ILHIE) Updates

Krysta Heaney reported that the Governor signed House Bill 5925 into law last month. It was an amendment to three laws and was modeled after the Mental Health and Developmental Disabilities Code Act. The three laws affected are the AIDS Confidentiality Act, the Genetic Information Protection Act and the Clinical Lab and Blood Bank Act. It aligns those acts with the Health Insurance Portability and Accountability Act and facilitates the sharing of those types of specially protected information through the HIE. The law becomes effective January 1, 2015. ILHIE will hold work group and committee meetings with stakeholders to get input on revising the opt out/opt in form, as well as the notice that providers give to patients as their meaningful disclosure that lets patients know about the HIE and the ability to opt out. Krysta will include the various agencies that assisted with the amendment in the work group meetings.

Selected Survey Results and Meeting with Laura Zarembo

Marvin discussed the analysis that the Illinois Health Information Technology Regional Extension Center did of the survey results that this work group developed. Marvin thinks that the survey results will help when trying to convince others to include behavioral health in their network. Laura Zarembo suggested that the information be distilled down to relative points of the results in a presentable format. It would be helpful to design the survey results so they can be used by the resource center in the Alliance for Health. The analysis also can be used to inform the internal Affordable Care Entity Work Group about information technology implementation.

Governor's Office of Health Innovation and Transformation Health Data and Technology Work Group

Marvin said the Health Data and Technology Work Group has three sub-committees which are the Open Data, Care Coordination and All Payer Claims Database sub-committees. The sub-committees will focus on a portable care plan. A survey was done regarding what information should be included in the electronic care plan.

Meeting adjourned. The next call is scheduled on December 4th.
